

MILITARY SCIENCE – U.S. ARMY

The Saint Louis University Department of Military Science has a long tradition of producing consistently superior U.S. Army officers for the active and reserve forces. For over 100 years, thousands of officers have earned their army commissions while students within the Gateway Battalion. We are proud of our past tradition, our present corps and we look forward to commissioning more officers of the highest caliber. The department offers both lower- and upper-division courses.

Health care degrees including nursing, physical therapists and occupational therapists are welcomed and encouraged to enroll into our courses to commission as army health care providers.

Enrollment in upper-division courses requires the approval of the professor of military science at Washington University in St. Louis. (Call 314-935-5546 for more information.)

Curriculum Overview

Lower-Division (General Military) Course

Military science courses MILS 1010 through MILS 2020 are basic or general military science courses. Grades earned in these courses will be computed in the student's overall grade point average. Advanced placement for lower-division courses can be granted for qualifying students.

Upper-Division (Professional Officer) Courses

Military science courses MILS 3010 through MILS 5010 are advanced or professional officer development courses. Enrollment requires satisfactory completion of lower-division courses or equivalent advanced placement credit. While some flexibility in scheduling exists, MILS 3010 and 3020 must be taken sequentially.

Federal scholarships are available to Army ROTC cadets, regardless of academic major. High school seniors must apply online at the Army ROTC Cadet Command website (<https://www.goarmy.com/careers-and-jobs/find-your-path/army-officers/rotc/scholarships/>).

All Army ROTC Scholarships cover full tuition and fees while Saint Louis University provides room and board (Double-occupancy Griesedieck Complex with average meal plan rate).
