

DEPARTMENT OF OPERATIONS AND INFORMATION TECHNOLOGY MANAGEMENT

The Department of Operations and Information Technology Management at Saint Louis University's Richard A. Chaifetz School of Business (<https://www.slu.edu/business/>) offers programs at both the undergraduate and graduate levels that prepare students to lead in technology-driven business environments. Undergraduate students pursue a Bachelor of Science in Business Administration in Business Technology Management (<https://catalog.slu.edu/colleges-schools/business/operations-information-technology-management/business-technology-management-bs/>), while graduate students may enroll in the STEM-certified Master of Science in Supply Chain Management (<https://catalog.slu.edu/colleges-schools/business/operations-information-technology-management/supply-chain-management-ms-scm/>). Together, these programs emphasize the integration of business processes, data analytics and enterprise systems in modern organizations.

The business technology management major, with an optional concentration in analytics and enterprise systems, prepares students for careers managing technology within organizations. Grounded in market demand, the curriculum emphasizes business analytics, managing artificial intelligence strategy and implementation, and enterprise systems management.

As a member of the SAP University Alliance – and the only business school in the St. Louis region to offer SAP certification – the Richard A. Chaifetz School of Business (<https://www.slu.edu/business/>) provides students with hands-on experience using SAP software and enterprise resource planning (ERP) tools. Students who demonstrate proficiency may earn SAP-recognized certification.

The Master of Science in Supply Chain Management (<https://catalog.slu.edu/colleges-schools/business/operations-information-technology-management/supply-chain-management-ms-scm/>) prepares students to understand and lead complex, technology-enabled supply chains through the application of analytics and quantitative modeling.
