

# CENTER FOR ANATOMICAL SCIENCE AND EDUCATION

---

**The Center for Anatomical Science and Education (CASE) at Saint Louis University's School of Medicine offers graduate programs in anatomical sciences designed to prepare students for careers in research, education and academic medicine. Through rigorous coursework and mentored research, students develop advanced expertise in human anatomy, neurobiology and related biomedical disciplines.**

With more than a century of excellence in anatomical education, CASE provides a collaborative, research-intensive environment where graduate students work closely with SLU faculty mentors whose scholarly interests align with their own. Students engage in hypothesis-driven research, contribute to peer-reviewed publications, and present their findings at scientific conferences. Doctoral candidates are expected to complete and disseminate a research project as part of their scholarly training.

The program also offers a concentration in neurobiology, providing specialized preparation for careers in neuroscience research and related fields.

## Leadership

John R. Martin III, Ph.D.  
*CASE director*

Daniel T. Daly, D.C., Ph.D.  
*Graduate program director*

Patty Anderson  
*Anatomy graduate program coordinator*

## Programs

- Anatomy, M.S. (<https://catalog.slu.edu/colleges-schools/medicine/anatomy/master-science-anatomy/>)
- Anatomy, Ph.D. (<https://catalog.slu.edu/colleges-schools/medicine/anatomy/doctor-philosophy-anatomy/>)

## Faculty

Michael Ariel, Ph.D.  
Jay Bauman, Ph.D.  
Meadow Campbell, Ph.D.  
Daniel T. Daly, D.C., Ph.D.  
John R. Martin III, Ph.D.  
Aidan Ruth, Ph.D.  
Alicia Pate, Ph.D.  
Yun Tan, M.D., Ph.D.
