

HEALTH MANAGEMENT, MINOR

Saint Louis University's minor in health management provides students with an introduction to the structure and management of the U.S. health care system. Throughout their coursework, students examine challenges that impact the delivery of care, such as those related to organization, finance, policy and operations.

A minor in health management is an excellent choice for students who seek to supplement their primary field of study with training in health care systems. Pre-health students will add to their studies by gaining insight into the structures and systems in which they will work as future clinicians.

The health management minor is offered through the College for Public Health and Social Justice (<https://www.slu.edu/public-health-social-justice/>), accredited by the Council on Education for Public Health. A total of 18 credits are required to complete the health management minor.

Curriculum Overview

The minor in health management includes six credits of required coursework that introduces students to the health care system and management of health care organizations. Students then select 12 credits of elective coursework that includes topics such as health care economics, health care marketing, health care operations, health care financial management and more.

Requirements

Code	Title	Credits
Required Courses		
HMP 1300	Contemporary Challenges in Health Care	3
HMP 2500	Management of Health Care Organizations	3
Elective Courses		12
Select 12 credits with the (p. 1)Health Management Minor Elective attribute		
Total Credits		18

Roadmap

This roadmap is just one example of a semester-by-semester plan of study for this program. There are other plans students can and do take. The plan of study for each particular student is established in consultation with each student's academic advisor; *this roadmap does not replace academic advising appointments.*

Roadmap notes:

- This Roadmap assumes full-time enrollment unless otherwise noted.
- Courses/Milestones marked with an "!" are critical and must be completed in the semester listed in the Roadmap to ensure a timely graduation.
- Course availability and sequencing are subject to change.
