An examination of the basic theories, principles and research relating to growth and development from a physical, intellectual, social and emotional perspective. Covers development from prenatal period through age five. Review of characteristics of major conditions (including developmental disabilities and giftedness) impacting on development. Field experience with infant/toddlers.

EDF 3840 - Professional Ethics

3 Credits

This course begins with an examination of the concept of professional ethics and its relationship to general ethics. It studies the notions of morality and justice as well as the relationship between morality, values, and religion. Particular emphasis will be placed on the dynamic nature of moral and professional ethical developments, their similarities and the differences between ethics in a variety of service-oriented professions, and the impact of one's values on the ethical treatment of individuals. Ethical issues in education, governments, clinical settings, healthcare, law and business will be investigated through a case study approach and an individual code of professional ethics will be generated.

EDF 3890 - School and Community

3 Credits

This course is designed to acquaint pre-service teachers with the theories, practices, skills, and knowledge of school and community partnerships. This course explores the question 'what role does the family and community play in the educational development of children?' There is a focus in this course to develop understandings of diverse contexts when working with communities, families, children. In this course students will study themselves, the schools, communities, families, and children in the contexts of future teaching situations.

EDF 3930 - Special Topics

3 Credits

EDF 3980 - Independent Study

1-3 Credits (Repeatable for credit)
Independent Study.
